Professional Experience

EDUCATIONAL FUNDING COMPANY, *Bethesda, MD*   09/2018 – 04/2019
Front-End/React Developer

- Managed the day-to-day operations of the Front-End Dev team by leading daily standups, assigning tasks, and performing code reviews
- Actively involved in every aspect of the SDLC, including requirements gathering, determining LOE, and deploying to multiple environments
- Refactored existing components to adhere to the team's coding standards and best practices, while also improving performance and scalability
- Worked exclusively with AJAX libraries and REST APIs to perform the appropriate CRUD operations
- Applied advanced CSS concepts such as media queries and flexbox to create a responsive application

TTC INC., *Arlington, VA*   04/2015 – 09/2018
Application Developer

- Leveraged MVC design principles to implement Angular controllers and components for the organization's internal applications
- Improved and created full stack solutions with an emphasis on the user experience, responsive design, and cross-browser compatibility
- Collaborated with Developers, Project Managers, and Administrators in an Agile environment to ensure clients received high quality web-based applications
- Implemented business intelligence, reporting, and workflows into high traffic web sites which helped the company to attain the CMMI Level 2 Certification
- Managed and trained Junior Developers to create cutting edge solutions using modern Javascript frameworks
- Debugged and applied troubleshooting techniques to fix critical programming errors

U.S. DEPARTMENT OF AGRICULTURE - BRS, *Riverdale, Md*   06/2016 – 04/2017
JavaScript/UI Developer (Contractor w/ TTC)

- Designed, tested, and deployed highly-interactive GUIs using Javascript, Bootstrap, & RESTful Web Services which increased user efficiency
- Analyzed and improved existing Single Page Applications by utilizing third party APIs and AJAX functionality which allowed the system to achieve optimal performance levels
- Applied best practices for solution design and architecture, such as encapsulation, client side validation, and code reusability
- Engaged with senior-level decision makers to manage/coordinate multiple, high-priority projects while meeting strict deadlines

William Murphy

U.S. DEPARTMENT OF AGRICULTURE - NIFA , *Washington, D.C.*   **04/2017 – 09/2018**
SharePoint/Nintex Engineer (Contractor w/ TTC)

- Architected enterprise level solutions by mapping complex business problems to end-to-end technology solutions
- Developed project technology strategies, including the gathering of requirements, sprint planning, and preparing time & cost estimates
- Established strong client relationships through organizing and leading necessary weekly meetings
- Promoted the use of SharePoint throughout the agency by streamlining intricate processes and alleviating unnecessary costs
- Offered Tier-2 support to end users for the Microsoft platform and other proprietary software

Certifications

- ICAgile Certified Professional
- Free Code Camp Front End Development
- Nintex Workflow Pro
- Nintex Workflow Admin
